

CURRENT DEVELOPMENT STAGE

The Nextgear differential is ready to be implemented in the next weeks into the Go-Kart e-motor.

Then the goal is to adapt and set it into electric and thermic vehicles.

Technical informations :

Length : 230 mm

Diameter : 33 mm

Power support : 30 kw

Power support can be easily adapted to 200 kw and more with very low diameter change.

March 2024 : article in an automotive magazine

On our developing strategy, we had an article in the « Annonces-automobile » magazine, available online too.

It gives more details about the company, the product, the goal and how it works.

Salon Automobile de Lyon 2023

During end of 20203 we've attempted at the Salon Automobile de Lyonin France.

It was the opportunity to show our product at the special event ; feedbacks from professionals and people have been very encouraging.
